

Meet the Trainer

Terence Kwok, PMP®, BComp (Sys Dev't)

Terence has more than 15 years in ICT project management experience specializing in banking and telecommunications industries. He gained these valuable working experiences in regional project management with the National Computer Board, ABN Amro Bank, Getronics and Nokia.

Working as an Area Project Manager with Nokia, he was responsible for the implementation of 2G & 3G core networks for regional telecom operators. Currently, with the Project Management Office for Nokia's IT organization, he focuses on the quality of ICT projects in Asia Pacific and training of project managers. Terence sits on the project management taskforce for competency & methodology development. He also contributes many articles related to project management for the corporate newsletters.

Terence is a PMI-certified PMP® since 2002 and a qualified Action-based Trainer (AIU).

Significant Achievements

Project Management – Some of Terence's notable achievements include the relocation of the ABN Amro Bank's IT infrastructure in Singapore, deployment of the country-wide GPRS network in Taiwan for KG Telecom, MMSC infrastructure implementation in Thailand for DTAC and re-alignment of the IT operations for the mobile phone factory in South Korea.

Training and Consultancy – Conducted project management workshops for corporate executives in Asia Pacific in the public & private sector since 1998. These included Public Service Commission, Deutsche Bank, Getronics, SSMC, Nokia and others.

Previous Achievements

National Computer Board/Public Service Commission

As Project Leader, Terence was responsible for system analysis, development & maintenance of the Scholarship & Superscale Applications.

ABN Amro Bank

As the head of Projects & Administration for the Asia Pacific IT organization, his key role was to spearhead global IT projects in the Asia Pacific region.

Getronics

As Program Manager with Getronics with Dell as strategic partner, Terence was responsible to implement Deutsche Bank's project to deploy 4000+ PCs in the Asia Pacific region to its global PC desktop standard.
